I. Introduction

1. The initial budget for the maintenance of the United Nations Mission in Ethiopia and Eritrea (UNMEE) for the period from 1 July 2006 to 30 June 2007 amounted to \$175,266,900 gross (\$171,703,200 net) (see A/60/636 and Corr.1). On the basis of the recommendation of the Advisory Committee on Administrative and Budgetary Questions (see A/60/790), the General Assembly, in its resolution 60/272, appropriated the amount of \$174,679,200 gross (\$171,115,500 net) for the maintenance of the Mission for the same period.

2. Subsequently, in order to implement the reconfiguration of the military component of the Mission as authorized by the Security Council in its resolution 1681 (2006), the Secretary-General submitted a revised budget for UNMEE for 2006/07 (A/61/521 and Corr.1), which amounted to \$145,516,400 gross (\$142,765,400 net). It provided for 230 military observers, 2,070 military contingent personnel, 205 international staff, 248 national staff and 68 United Nations Volunteers, as well as 5 international and 2 national positions under general temporary assistance for the Conduct and Discipline Team.

3. On the basis of the recommendation of the Advisory Committee on Administrative and Budgetary Questions (see A/61/575), the General Assembly, by its resolution 61/248 A, reduced the appropriation of \$174,679,200 gross (\$171,115,500 net) for the maintenance of the Mission for 2006/07 under the terms of its resolution 60/272 to \$137,385,100 gross (\$134,634,100 net). The total amount has been assessed on Member States.

II. Mandate performance

4. The mandate of the Mission was established by the Security Council in its resolutions 1312 (2000) and 1320 (2000), further adjusted in resolution 1430 (2002) and extended in subsequent resolutions of the Council. The mandate for the performance period was provided by the Council in its resolutions 1681 (2006), 1710 (2006) and 1741 (2007).

5. By its resolution 1681 (2006), the Council authorized the reconfiguration of the military component of the Mission and approved the deployment of up to 2,300 troops, including up to 230 military observers. Subsequently, the Council, in its resolution 1741 (2007), adjusted the authorized strength to 1,700 military personnel, including 230 military observers.

6. The Mission is mandated to help the Security Council achieve an overall objective, namely, the peaceful settlement of the dispute between Ethiopia and Eritrea.

7. Within this overall objective, the Mission has, during the reporting period, contributed to a number of accomplishments by delivering related key outputs, shown in the frameworks below for the substantive civilian, military and support components.

8. The present report assesses actual performance against the planned results-based-budgeting frameworks set out in the 2006/07 budget. In particular, the performance report compares the actual indicators of achievement, that is, the extent to which progress has been made during the period against the expected accomplishments, with the planned indicators of achievement and the actually completed outputs with the planned outputs.

B. Monthly expenditure pattern

9. Higher expenditures for the months of July 2006 and February 2007 were attributable to the recording of obligations for reimbursement to troop-contributing Governments for troop costs, major equipment and self-sustainment, as well as for the provision of rations for military contingents.

IV. Analysis of variances¹

	<i>Variance</i>
Military observers	\$105.2 1.4%

10. The unspent balance was due primarily to the lower actual average round-trip airfare cost of \$4,786 compared with the budgeted average cost of \$5,200.

	<i>Variance</i>
Military contingents	\$606.9 1.1%

11. The unutilized balance was due primarily to lower actual requirements for reimbursements to troop-contributing countries for major equipment as a result of the further downsizing of military contingents pursuant to Security Council resolution 1741 (2007), offset by an inadvertent charge relating to the cost of the

¹ Resource variance amounts are expressed in thousands of United States dollars. Analysis is provided for variances of at least plus or minus 5 per cent or \$100,000.

acquisition of containers to the military contingents class of expenditures (see also para. 17 below).

	<i>Variance</i>	
International staff	\$1 861.2	8.5%

12. The unutilized balance was due primarily to lower actual requirements than budgeted for staff salaries and mission subsistence allowance as a result of the actual vacancy rate of 29.0 per cent compared with the budgeted rate of 20.0 per cent owing to a high turnover of staff, difficulty in attracting prospective candidates and restrictions imposed on the Mission in respect of certain nationalities.

	<i>Variance</i>	
United Nations Volunteers	\$127.8	5.4%

13. The unspent balance was due to the fact that the actual vacancy rate of 13.8 per cent was higher than the budgeted vacancy rate of 7.0 per cent.

	<i>Variance</i>	
General temporary assistance	\$708.5	95.9%

14. The unutilized balance under this heading was attributable to difficulties in identifying suitable personnel for the Conduct and Discipline Team of the Mission, for which the position of Chief was not filled until June 2007.

	<i>Variance</i>	
Consultants	(\$5.0)	—

15. The expenditure recorded under this heading represented the Mission's pro rata share of the cost of outside consultancy services engaged by United Nations Headquarters in connection with the establishment of a new rations contract.

	<i>Variance</i>	
Official travel	\$98.6	14.8%

16. The unutilized balance under this heading was due primarily to the cancellation of planned travel of the Mission's substantive staff, as fewer meetings of the Eritrea-Ethiopia Boundary Commission and the Military Coordination Commission were held.

	<i>Variance</i>	
Facilities and infrastructure	\$2 202.5	15.7%

17. The unutilized balance under this heading was due primarily to the downsizing of the Mission and the resulting lower actual requirements for maintenance services, security services, construction services, spare parts and supplies and generator fuel

and for the reimbursement of troop-contributing countries for self-sustainment costs. Additionally, the cost of the acquisition of containers was inadvertently charged to the line item of the budget relating to freight of contingent-owned equipment under the military contingents class of expenditures.

	<i>Variance</i>	
Ground transportation	\$583.4	10.8%

18. The unspent balance under this heading was due to the non-procurement of 17 vehicles and lower actual requirements for spare parts and petrol, oil and lubricants in view of the downsizing of the Mission.

	<i>Variance</i>	
Air transportation	\$1 190.1	13.4%

19. The unutilized balance resulted primarily from lower actual requirements for aviation fuel and rental and operation costs for fixed-wing aircraft and helicopters as a result of the completion of 571 fewer flight hours than planned. Of the 1,680 flight hours budgeted for fixed-wing aircraft, only 1,522 were completed owing to the imposition of restrictions on the freedom of mission personnel travel and lower actual requirements for medical and casualty evacuation flights. A total of 1,027 flight hours were completed by the helicopters, compared with 1,440 budgeted hours owing to the lower actual requirements for the support of the United Nations military observers and military post sites.

	<i>Variance</i>	
Communications	\$787.7	16.1%

20. The unutilized balance resulted mainly from lower actual requirements for communication support services, reimbursements to troop-contributing countries for self-sustainment costs and public information services. The unspent balance for communications support services accrued from reduced requirements for the engagement of international contractual staff in view of the downsizing of the Mission. Lower actual requirements under public information services resulted from the curtailment of some outputs owing to the shortage of staff.

	<i>Variance</i>	
Information technology	\$132.6	13.0%

21. The unutilized balance was due primarily to the reduced requirement for the engagement of international contractual personnel in view of the downsizing of the Mission.

	<i>Variance</i>	
Medical	\$149.0	9.4%

22. The unspent balance was due primarily to reduced requirements for the reimbursement of troop-contributing countries for self-sustainment costs as a result of the downsizing of military contingent personnel.

	<i>Variance</i>	
Special equipment	\$168.9	17.0%

23. The unspent balance was due to reduced requirements for the reimbursement of troop-contributing countries for self-sustainment costs as a result of the downsizing of military contingent personnel and to the non-procurement of mine-detection and mine-clearing equipment, as there was a decrease in mine-clearance activities owing to restrictions imposed on the movement of mission personnel.

	<i>Variance</i>	
Other supplies, services and equipment	\$1 991.0	19.1%

24. The unutilized balance under this heading was due primarily to lower actual requirements for mine-detection and mine-clearing services, as well as for the transportation of the United Nations-owned equipment to the United Nations Logistics Base at Brindisi, Italy. The restrictions on the movement of personnel imposed on the Mission resulted in a reduction in the scope of planned mine-detection and mine-clearing projects. The planned repatriation of United Nations-owned surplus equipment from UNMEE to the Logistics Base following the downsizing of the Mission was not undertaken as planned before the end of the period under review.

V. Actions to be taken by the General Assembly

25. The actions to be taken by the General Assembly in connection with the financing of UNMEE are:

(a) To decide on the treatment of the unencumbered balance of \$10,766,700 with respect to the period from 1 July 2006 to 30 June 2007;

(b) To decide on the treatment of other income for the period ended 30 June 2007 amounting to \$7,245,700 from interest income (\$2,466,000), other/miscellaneous income (\$295,000) and savings on or cancellation of prior-period obligations (\$4,491,700), offset by prior-period adjustments (\$7,000).
