

# General Assembly

Distr.: Limited  
16 July 2021

Original: English

---

## Seventy-fifth session

Agenda item 14

### **Integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits in the economic, social and related fields**

#### **Gabon and Germany: draft resolution**

#### **Tackling illicit trafficking in wildlife**

*The General Assembly,*

*Reaffirming* its resolutions [69/314](#) of 30 July 2015, [70/301](#) of 9 September 2016, [71/326](#) of 11 September 2017 and [73/343](#) of 16 September 2019 on tackling illicit trafficking in wildlife,

*Reaffirming also* its resolution [70/1](#) of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, by which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets,

*Reaffirming further* the intrinsic value of biological diversity and its various contributions to sustainable development and human well-being, and recognizing that wild fauna and flora in their many beautiful and varied forms are an irreplaceable part of the natural systems of the Earth which must be protected for this generation and the generations to come,

*Seriously concerned* about the rate of species extinctions, as indicated in the findings of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services, and stressing the urgent need to address the unprecedented global decline in biodiversity, including by preventing the extinction of threatened species, to improve and sustain their conservation status and to restore and safeguard ecosystems that provide essential functions and services, including services related to water, health, livelihoods and well-being,

*Remaining concerned,* therefore, about the increasing scale of poaching and illegal trade in wildlife and wildlife products and its adverse economic, social and environmental impacts,

*Expressing serious concern* over the extraordinarily detrimental levels of rhinoceros poaching, the alarmingly high levels of killings of elephants in Africa and the significant increase in illicit pangolin trafficking, as well as the illegal trade in

other protected wildlife species, including but not limited to tortoises, marine and freshwater turtles, land and marine iguanas, other reptiles, sharks, ornamental fish, great apes, parrots, raptors, the helmeted hornbill and big cats, including the snow leopard, which threaten those species with local extinction and, in some cases, with global extinction,

*Noting with concern* that, in addition to long-established illicit markets, new illicit markets are constantly emerging and pushing other species into the endangered category, such as the European eel or, owing to the illegal pet trade, the Philippine forest turtle and the pancake tortoise,

*Noting* that, since the outbreak of the coronavirus disease (COVID-19), some countries have reported a decline in seizures of illicitly trafficked wildlife, likely due to lockdowns, economic slowdown and restricted human and goods transport, while also noting reports indicating a corresponding increase in stockpiling of illicit wildlife and its products in origin countries,

*Recognizing* that rapid and profound socioecological changes, among other factors, such as degradation and unsustainable use of ecosystems, loss of habitats, and poorly managed wildlife trade drive the risk of a large-scale species extinction and biodiversity loss, threaten the vital contributions that nature makes to people and their livelihoods and increase the likelihood of zoonotic diseases emerging and spreading among wildlife, livestock and domestic animals, which consequently increases the risk of pathogens spreading from animals to humans, leading to zoonotic disease outbreaks, epidemics and, in extreme cases, pandemics,

*Recognizing also* that illicit trafficking in live wild animals and bushmeat does not adhere to sanitary regulations and avoids quarantine controls on import, and can therefore increase the probability of novel infections among trafficked animals and represents an increased risk for transmitting zoonotic diseases, with the potential to negatively impact human and animal health,

*Determined* to reduce the risks for future outbreaks of zoonotic diseases, which may lead to epidemics and, in extreme cases, pandemics and their devastating impact on human health and livelihoods, and recognizing that curbing illicit wildlife trafficking and conserving and restoring biodiversity and functioning ecosystems can contribute to reducing the risk of emergence and spread of zoonotic diseases,

*Recognizing* that wildlife crime may contribute to disease outbreaks, epidemics and, in extreme cases, pandemics, which may be a threat not only to the environment and biodiversity, but also to human health and economic development,

*Recognizing also* that human, animal, plant and ecosystem health are interdependent, and therefore emphasizing that biodiversity and health linkages should be addressed holistically, recalling in this regard decision 14/4 of 30 November 2018 of the Conference of the Parties to the Convention on Biological Diversity<sup>1</sup> and resolution 3/4 of 30 January 2018 of the United Nations Environment Assembly,<sup>2</sup>

*Underlining* the need to take measures to combat illegal harvesting of timber and associated trade, which leads to the decimation of rare timber species, in particular of rosewood, agarwood and sandalwood, and noting the high volume of rosewood imports derived from illegal sources and the need to prevent illegally harvested timber from being laundered along global supply chains,

<sup>1</sup> See United Nations Environment Programme, document CBD/COP/14/14, sect. I.

<sup>2</sup> [UNEP/EA.3/Res.4](#).

*Recognizing* that illicit trafficking in wildlife contributes to the extinction of many species and damage to ecosystems and rural livelihoods, including those based on ecotourism, undermines good governance and the rule of law and, in some cases, threatens national stability and requires enhanced transnational and regional cooperation and coordination in response,

*Emphasizing* that the protection of wildlife must be part of a comprehensive approach to achieving poverty eradication, food security, sustainable development, including the conservation and sustainable use of biological diversity, economic growth, social well-being and sustainable livelihoods,

*Emphasizing also*, in this regard, the need to develop context-specific solutions for the sustainable and resilient coexistence of humans and wildlife, both within and outside protected areas, with the aim of contributing to the improvement of livelihoods and to conservation efforts,

*Recalling* its resolution 61/295 of 13 September 2007, entitled “United Nations Declaration on the Rights of Indigenous Peoples”, recognizing that respect for indigenous traditional practices contributes to sustainable and equitable development and proper management of the environment, and recognizing also the essential engagement role of indigenous peoples and local communities to ensure a sustainable solution to addressing the illegal wildlife trade,

*Reaffirming its call for* holistic and integrated approaches to sustainable development that will guide humanity to live in harmony with nature and lead to efforts to restore the health and integrity of the Earth’s ecosystem, which will contribute to the implementation of the 2030 Agenda and achievement of the Sustainable Development Goals for the common future of present and coming generations,

*Noting with concern* the increased use of online intermediaries, including social media platforms and online marketplaces, that facilitate the trafficking in wildlife and wildlife products, and recognizing the need to develop and utilize relevant techniques to counter illicit wildlife trafficking online, recognizing in this regard the need for enhanced technical and digital capacity-building, in particular for developing countries,

*Concerned* about the persistent use of forged or illegally issued permits and certificates or the fraudulent use of authentic permits and certificates in order to misuse domestic legal markets to mask trade in illegally obtained wildlife or wildlife products, or to launder such illegally obtained wildlife or wildlife products, and concerned also about the facilitating role of corruption in this regard,

*Recognizing* the legal framework provided by and the important role of the Convention on International Trade in Endangered Species of Wild Fauna and Flora<sup>3</sup> as the primary mechanism for regulating international trade in species of wild fauna and flora listed in its appendices, and in this regard welcoming the relevant resolutions and decisions adopted at the eighteenth meeting of the Conference of the Parties to the Convention, held in Geneva from 17 to 28 August 2019,

*Recognizing also* the importance of other multilateral environmental agreements, including the Convention on the Conservation of Migratory Species of Wild Animals,<sup>4</sup> the Convention on Biological Diversity,<sup>5</sup> the Convention concerning

<sup>3</sup> United Nations, *Treaty Series*, vol. 993, No. 14537.

<sup>4</sup> *Ibid.*, vol. 1651, No. 28395.

<sup>5</sup> *Ibid.*, vol. 1760, No. 30619.

the Protection of the World Cultural and Natural Heritage<sup>6</sup> and the Convention on Wetlands of International Importance especially as Waterfowl Habitat,<sup>7</sup>

*Recalling* Economic and Social Council resolution 2013/40 of 25 July 2013 on crime prevention and criminal justice responses to illicit trafficking in protected species of wild fauna and flora, in which the Council encouraged Member States to make illicit trafficking in protected species of wild fauna and flora involving organized criminal groups a serious crime,

*Noting* that wildlife trafficking is a lucrative form of transnational organized crime and can be linked to other forms of transnational organized crime, and noting with concern the role that corruption can play in facilitating illicit trafficking in wildlife and wildlife products,

*Reaffirming* that the United Nations Convention against Transnational Organized Crime<sup>8</sup> and the United Nations Convention against Corruption<sup>9</sup> constitute effective tools and an important part of the legal framework for international cooperation in fighting illicit trafficking in endangered species of wild fauna and flora,

*Bearing in mind* that the illicit trade in small arms and light weapons and other forms of transnational organized crime could be linked to illicit trafficking in wildlife, which may pose a serious threat to national and regional stability in some parts of Africa,

*Recognizing* the important work of the International Consortium on Combating Wildlife Crime, a collaborative effort of the secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, the International Criminal Police Organization (INTERPOL), the United Nations Office on Drugs and Crime, the World Bank and the World Customs Organization, by, inter alia, providing technical assistance to Member States,

*Welcoming* resolution 2/14 of 27 May 2016 of the United Nations Environment Assembly of the United Nations Environment Programme, on the illegal trade in wildlife and wildlife products,<sup>10</sup>

*Welcoming also* the efforts of and cooperation between Member States, intergovernmental organizations and non-governmental organizations, as well as activities of United Nations agencies and other entities, aimed at preventing and fighting illicit trafficking in wildlife, and in this regard taking note of the Paris Declaration of 2013, the London Declaration of 2014, the Kasane Statement of 2015, the Brazzaville Declaration of 2015, the Hanoi Statement of 2016, the Bishkek Declaration of 2017, the London Declaration of 2018, the Lima Declaration of 2019, the Chiang Mai Statement of 2019, and the Gandhinagar Declaration of 2020 as the outcome of the thirteenth meeting of the Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals, as well as the Leaders Pledge for Nature of 2020,

*Welcoming further* the adoption of the CITES Strategic Vision 2021–2030 at the eighteenth meeting of the Conference of Parties to the Convention on International Trade in Endangered Species of Wild Flora and Fauna,

<sup>7</sup> Ibid., vol. 996, No. 14583.

<sup>8</sup> Ibid., vol. 2225, No. 39574.

<sup>9</sup> Ibid., vol. 2349, No. 42146.

<sup>10</sup> See Official Records of the General Assembly, Seventy-first Session, Supplement No. 25 (A/71/25), annex.

*Welcoming* the convening of the summit on biodiversity on 30 September 2020, at the level of Heads of State and Government, in order to highlight the urgency of action at the highest levels in support of a post-2020 global biodiversity framework that contributes to the 2030 Agenda and places the global community on a path towards realizing the 2050 Vision for Biodiversity, “Living in harmony with nature”,

*Underlining* the importance of the fifteenth meeting of the Conference of the Parties to the Convention on Biological Diversity, to be held in Kunming, China, from 11 to 24 October 2021, at which the Conference is mandated to review the progress in the implementation of the Convention and adopt a post-2020 global biodiversity framework, considering the 2050 vision of the current strategic plan, “Living in harmony with nature”,

*Recalling* its resolution [75/271](#) of 16 April 2021, entitled “Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use”,

*Recalling also* its resolution [68/205](#) of 20 December 2013, in which it proclaimed 3 March, the day of the adoption of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, as World Wildlife Day, and welcoming the international observance of the Day since 2014 in order to celebrate and raise awareness of the world’s wild fauna and flora,

*Welcoming* the adoption by the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice of the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law: Towards the Achievement of the 2030 Agenda for Sustainable Development,<sup>11</sup> in which Heads of State and Government, ministers and representatives of Member States expressed deep concern about the negative impact of crimes that affect the environment and endeavoured to adopt effective measures to prevent and combat crimes that affect the environment, and taking note of resolution 8/12 of 20 December 2019, entitled “Preventing and combating corruption as it relates to crimes that have an impact on the environment”, of the Conference of the States Parties to the United Nations Convention against Corruption,<sup>12</sup> as well as resolution [10/6](#) of 16 October 2020, entitled “Preventing and combating crimes that affect the environment falling within the scope of the United Nations Convention against Transnational Organized Crime”, of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime,<sup>13</sup>

*Reaffirming* the role of the Commission on Crime Prevention and Criminal Justice as the principal policymaking body of the United Nations for crime prevention and criminal justice matters,

*Recalling* its resolution [71/285](#) of 27 April 2017, by which it adopted the United Nations strategic plan for forests 2017–2030,

*Taking note* of the *World Wildlife Crime Report: Trafficking in Protected Species*, prepared by the United Nations Office on Drugs and Crime in 2020,<sup>14</sup>

*Taking note also* of the report entitled “Strengthening legal frameworks for licit and illicit trade in wildlife and forest products: lessons from the natural resource management, trade regulation and criminal justice sectors”, prepared by the United Nations Environment Programme in 2018,

<sup>11</sup> [A/CONF.234/16](#), chap. I, resolution I.

<sup>13</sup> See [CTOC/COP/2020/10](#), sect. I.A.

<sup>14</sup> United Nations publication, 2020.

1. *Stresses its continued determination* to implement fully and without delay the commitments undertaken in its resolutions [69/314](#), [70/301](#), [71/326](#) and [73/343](#);

2. *Recognizes* the economic, social and environmental impacts of illicit trafficking in wildlife, where firm and strengthened action needs to be taken on the supply, transit and demand sides, and re-emphasizes the importance, in this regard, of effective international cooperation among Member States, relevant multilateral environmental agreements and international organizations;

3. *Urges* Member States to reinforce their efforts and adopt effective measures to prevent and counter the serious problem of crimes that have an impact on the environment, conservation and biodiversity, such as illicit trafficking in wildlife and wildlife products, which encompasses poaching and illegal harvesting of timber, including fauna and flora as protected by the Convention on International Trade in Endangered Species of Wild Fauna and Flora;

4. *Invites* Member States, relevant United Nations entities and other international organizations to strengthen partnerships and cooperation to promote a holistic approach to address health and environmental aspects of wildlife trade, using holistic, all-hazards and One Health approaches, recognizing the interconnectedness between the health of humans, animals, plants and their shared environment, including through collaboration among the World Health Organization, the Food and Agriculture Organization of the United Nations, the World Organization for Animal Health and the United Nations Environment Programme, and taking note of the Berlin Conference “One Planet, One Health, One Future” of October 2019 and its outcome;

5. *Urges* Member States to take decisive steps at the national level to prevent, combat and eradicate the illegal trade in wildlife, on the supply, transit and demand sides, including by strengthening their legislation and regulations necessary for the prevention, investigation, prosecution and appropriate punishment of such illegal trade, as well as by strengthening enforcement and criminal justice responses and to increase the exchange of information and knowledge among national authorities as well as among Member States and international crime authorities, in accordance with national legislation and international law, acknowledging that the International Consortium on Combating Wildlife Crime can provide valuable technical assistance in this regard, including through supporting Member States in the implementation of the Wildlife and Forest Crime Analytic Toolkit, which is aimed at strengthening, where appropriate, the capacity of relevant law enforcement authorities and judiciaries in investigating, prosecuting and adjudicating wildlife-related offences;

6. *Calls upon* Member States to make illicit trafficking in protected species of wild fauna and flora a serious crime, in accordance with their national legislation and as defined in article 2 (b) of the United Nations Convention against Transnational Organized Crime, in order to ensure that, where the offence is transnational in nature and involves an organized criminal group, effective international cooperation can be afforded under the Convention to prevent and combat transnational organized crime;

7. *Encourages* Member States to further utilize article II, paragraph 3, of the Convention on International Trade in Endangered Species of Wild Fauna and Flora by listing in its appendix III protected species in their jurisdiction that may become threatened as a result of international trade, and urges Member States to provide assistance in controlling the trade in those species protected under the Convention, including those listed in appendix III;

8. *Also encourages* Member States to take appropriate measures to enforce the provisions of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, including measures to penalize trade in, or possession of, such

illegally traded specimens, or both and to report all seizures in the CITES annual illegal trade reports;

9. *Calls upon* Member States to review and amend national legislation, as necessary and appropriate, so that offences connected to the illegal trade in wildlife are treated as predicate offences, as defined in the United Nations Convention against Transnational Organized Crime, for the purposes of domestic money-laundering offences and are actionable under domestic proceeds of crime legislation, and so that assets linked to illegal trade in wildlife and wildlife products can be seized, confiscated and disposed of;

10. *Encourages* Member States to make use, to the greatest extent possible, of legal instruments available at the national level to protect threatened species of wildlife and tackle illicit trafficking in wildlife, including through legislation related to money-laundering, corruption, fraud, racketeering and financial crime;

11. *Calls upon* Member States to integrate as appropriate, the investigation of financial crimes linked to wildlife trafficking into wildlife crime investigations and increase the use of financial investigation techniques and public-private collaboration to identify criminals and their networks, and to enhance, where appropriate and in accordance with domestic law, the capacity of relevant agencies, including law enforcement and financial intelligence units, to carry out and support financial investigations into wildlife trafficking, including the possible laundering of the proceeds of such crimes, and requests the United Nations Office on Drugs and Crime to continue to provide technical assistance, as appropriate, to Member States in that regard;

12. *Encourages* Member States to harmonize their judicial, legal and administrative regulations to support the exchange of evidence regarding and criminal prosecution of illicit trafficking in wildlife, as well as to establish national-level inter-agency wildlife crime task forces and facilitate the exchange of evidence between the different government agencies to the extent consistent with national legislation;

13. *Also encourages* Member States to enhance their enforcement efforts, including through recording and monitoring both seizures and successful prosecutions, in order to more effectively counter and deter the illegal trade in wildlife;

14. *Calls upon* Member States to increase attention and intergovernmental cooperation, as well as to strengthen appropriate capacity for law enforcement agencies to monitor and investigate illegal online wildlife trade, collect and analyse relevant evidence, including by using digital forensics, and develop enforcement countermeasures, including, when relevant, by engaging in public-private collaboration and supply and demand reduction to establish strategies to prevent illegal trade;

15. *Invites* Member States to work in cooperation with relevant organizations to identify and promote the use of solutions that utilize technology, in particular in regard to species identification, traceability and authentication for forensic science applications to support criminal prosecutions, as well as the analysis and visualization of data to monitor evolving crime trends and patterns;

16. *Urges* Member States to increase efforts and resources to raise awareness about and address the problems and risks associated with the supply and transit of and demand for illegal wildlife products, including by improving cooperation with all relevant stakeholders, engaging consumer groups and tackling the drivers of demand, and to more effectively reduce the demand, including by using targeted and evidence-based strategies in order to influence consumer behaviour, by leading behaviour

change campaigns, and create greater awareness of laws prohibiting illegal trade in wildlife and associated penalties;

17. *Calls upon* Member States to recognize the crucial role played by rangers and guards in the fight against illicit wildlife trafficking, in often very challenging conditions, to bolster and monitor ranger safety and activity in protected areas, to improve rangers' working conditions and welfare and to provide them with decent wages, necessary training, equipment and institutional support;

18. *Encourages* Member States to increase the capacity of local communities to pursue alternative livelihoods in order to reduce the risk of illicit wildlife trafficking, and in this context enhance support for sustainable livelihoods in origin countries;

19. *Calls upon* Member States to recognize the importance of research to understand the root causes of poaching and illegal harvesting of timber, as well as market drivers, including the risks of increased poaching due to financial losses, especially declines in tourism and associated revenues, faced by origin countries in the context of the COVID-19 pandemic, and the need to tailor research to the specific drivers of the illegal use of a species or product and to invest in tools, data analysis and funding to tackle demand for illegal wildlife products based on evidence and built on best practice;

20. *Invites* Member States to support the efforts of developing countries and countries with economies in transition to tackle illicit trafficking in wildlife, and in particular to adopt effective integrated policies against such trafficking, and to implement the Convention on International Trade in Endangered Species of Wild Fauna and Flora by, inter alia, providing financial or technical assistance, supporting efforts to access funding through the Global Environment Facility and providing financial and in-kind resources for capacity-building activities required in this regard, including in the implementation of the resolutions and decisions adopted at the eighteenth meeting of the Conference of the Parties to the Convention;

21. *Encourages* Member States and relevant United Nations entities as well as other international organizations to increase support to countries for tackling poaching, illegal harvesting of timber and illegal trade in wildlife, especially where the socioeconomic or fiscal impacts of the COVID-19 pandemic threaten the continuation of existing relevant domestic projects and programmes;

22. *Encourages* Member States to promote sustainable development in its three dimensions – economic, social and environmental – in a balanced, integrated manner, which requires a comprehensive, innovative, coordinated, inclusive and environmentally sustainable approach, especially to protect wild fauna and flora and to combat, with determination, the illegal trade in wildlife and wildlife products;

23. *Calls upon* Member States to ensure the full and effective participation and equal opportunities for leadership of women in the development and implementation of relevant policies and programmes addressing illicit wildlife trafficking, and further calls upon United Nations agencies to continue ensuring systematic gender mainstreaming into all policies and programmes of the United Nations system;

24. *Encourages* Member States to increase the capacity of local communities to pursue sustainable livelihood opportunities, including from their local wildlife resources, and eradicate poverty, by promoting, inter alia, innovative partnerships for conserving wildlife through shared management responsibilities, including community conservancies, public-private partnerships, sustainable tourism, revenue-sharing agreements and other income sources, such as sustainable agriculture;

25. *Also encourages* Member States to integrate measures to address illegal trade in wildlife into development policy and planning and the programming of development cooperation activities, and to further raise public awareness among individuals and communities to live sustainably in a world in which wildlife and other living species are protected;

26. *Calls upon* Member States to initiate or strengthen collaborative partnerships among local, regional, national and international development and conservation agencies so as to enhance support for community-led wildlife conservation and to promote the retention of benefits by local communities for the conservation and sustainable management of wildlife;

27. *Strongly encourages* Member States to enhance their support, including through transnational and regional cooperation, for the development of sustainable and, as appropriate, alternative livelihoods for communities affected by illicit trafficking in wildlife and its adverse impacts, with the full engagement of the communities in and adjacent to wildlife habitats as active partners in conservation and sustainable use, enhancing the rights and capacity of the members of such communities to manage and benefit from wildlife and wilderness;

28. *Also strongly encourages* Member States to participate in global, regional and national donor coordination to enhance communication and to avoid duplication of efforts as well as to increase knowledge-sharing efforts to enhance understanding and mobilization of bilateral, multilateral and private investments to prevent and combat illegal trade in wildlife in order to collectively maximize investment effectiveness and engage new partners to maximize the effectiveness of future interventions;

29. *Urges* Member States that have not yet done so to consider taking measures to ratify or accede to the Convention on International Trade in Endangered Species of Wild Fauna and Flora, the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Corruption, and calls upon parties to take appropriate measures to ensure the effective implementation of their obligations under the Convention on International Trade in Endangered Species of Wild Fauna and Flora and other relevant multilateral agreements, including by applying the international guidelines adopted by the Conference of the Parties to the latter Convention for the storage, stockpiling and disposal of illicit wildlife products and contraband, as well as to consider ways to share information with one another on best practices to tackle illicit trafficking in wildlife in line with those instruments;

30. *Calls upon* Member States to prohibit, prevent and counter any form of corruption that facilitates illicit trafficking in wildlife and wildlife products, including by assessing and mitigating corruption risks in their technical assistance and capacity-building programmes related to wildlife, by strengthening their capacity to investigate and by prosecuting such corruption, calls upon parties to implement all relevant resolutions and decisions adopted at the eighteenth meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and requests the United Nations Office on Drugs and Crime to continue to support Member States in this regard, upon their request;

31. *Also calls upon* Member States to ensure that legal domestic markets for wildlife products are not used to mask the trade in illegal wildlife products, and in this regard urges parties to implement and systematically monitor nationally the implementation of the resolutions adopted at the seventeenth and eighteenth meetings of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora recommending that all Governments close legal domestic ivory markets, as a matter of urgency, and close domestic

markets for commercial trade in tiger and other Asian big cat specimens, if these markets contribute to poaching or illegal trade;

32. *Strongly encourages* Member States, through their national competent authorities, to enforce all necessary sanitary monitoring, measures and controls to protect human or animal health, in accordance with their national context and priorities, international law, where applicable, and best practices, with regard to segments of markets selling dead and live wild animals and wildlife products, as well as to detect and combat illicit wildlife trafficking;

33. *Encourages* Member States to facilitate professional standards and mutual monitoring programmes on supply chain security for processing or otherwise using wildlife products, to prevent the introduction of illegally sourced wildlife into legal trade chains;

34. *Also encourages* Member States to take measures making permit systems more resilient to corruption and to take advantage of modern information and communications technologies for improved control and traceability of international trade in protected species of wild fauna and flora in order to prevent the use of fraudulent documents in the international trade in protected species;

35. *Recognizes* the efforts of the Group of 20 in countering corruption at both the global and the national levels, takes note with appreciation of the work at its summits held in Hangzhou, China, in 2016, in Hamburg, Germany, in 2017, in Osaka, Japan, in 2019, and in Riyadh, Saudi Arabia, in 2020, as well as its development of High-level Principles on Combating Corruption related to Illegal Trade in Wildlife and Wildlife Products and of the survey in 2018 on their implementation, led by the Group of 20 with the help of the United Nations Office on Drugs and Crime, and urges the Group to continue to engage other States Members of the United Nations and the Office in its work in an inclusive and transparent manner;

36. *Also recognizes* the efforts of the African Union and of the expert group for the implementation of the African Strategy on Combating Illegal Exploitation and Illegal Trade in Wild Fauna and Flora in Africa to prevent and reduce, with a view to eliminating, the illegal exploitation of and illegal trade in wild fauna and flora in Africa in a common coordinated response;

37. *Strongly encourages* Member States, in line with Economic and Social Council resolution [2013/40](#), to cooperate at the bilateral, regional and international levels to prevent, combat and eradicate international illicit trafficking in wildlife and wildlife products through, inter alia, the use of international legal instruments such as the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Corruption;

38. *Invites* parties to the United Nations Convention against Transnational Organized Crime to more effectively use the Convention to address illicit trafficking in wildlife, and to continue discussions on other possible international tools to combat wildlife trafficking;

39. *Encourages* Member States, where relevant and appropriate, to enhance cooperation for the timely and cost-efficient repatriation of live illegally traded wildlife, including eggs, consistent with the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and also, where relevant and appropriate, to enhance information-sharing among national and international authorities on the seizure of illegally traded wildlife and wildlife products in order to facilitate follow-up investigation and prosecution;

40. *Calls upon* United Nations organizations, within their respective mandates and in line with Economic and Social Council resolution [2013/40](#), to continue to

support efforts by Member States to fight illicit trafficking in wildlife, such as through capacity-building, and to improve cooperation with all relevant stakeholders in order to facilitate a holistic and comprehensive approach by the international community;

41. *Requests*, in this regard, the United Nations Office on Drugs and Crime, within its mandate and resources, in line with Economic and Social Council resolution [2013/40](#) and in close cooperation and collaboration with Member States, to continue and to strengthen the collection of information on patterns and flows of illicit trafficking in wildlife and to report thereon biennially;

42. *Requests* the Secretary-General to further improve the coordination of activities undertaken by the specialized agencies, funds and programmes of the United Nations system relating to the scope of the present resolution, within their respective mandates and in line with Economic and Social Council resolution [2013/40](#);

43. *Also requests* the Secretary-General, taking into account Economic and Social Council resolution [2013/40](#), to report to the General Assembly at its seventy-seventh session on the global status of illicit trafficking in wildlife, including poaching and illegal trade, taking into account the trends regarding illicit wildlife trafficking as a result of the COVID-19 pandemic, and on the implementation of the present resolution, and to make proposals for possible future action;

44. *Decides* to revisit the issue and the implementation of the present resolution on a biennial basis, next at its seventy-seventh session.

---
