

Security Council

Distr.: General
21 November 2019

Original: English

Note by the President of the Security Council

At its 7488th meeting, held on 20 July 2015 in connection with the item entitled “Non-proliferation”, the Security Council adopted resolution [2231 \(2015\)](#).

In paragraph 4 of the resolution, the Security Council requested the Director General of the International Atomic Energy Agency to provide regular updates to the Council on the implementation by the Islamic Republic of Iran of its commitments under the Joint Comprehensive Plan of Action and to report at any time any issue of concern directly affecting the fulfilment of those commitments.

Accordingly, the President herewith circulates the report of the Acting Director General dated 7 November 2019 (see annex).

Annex

Letter dated 7 November 2019 from the Acting Director General of the International Atomic Energy Agency addressed to the President of the Security Council

I have the honour to enclose herewith the document submitted to the Board of Governors of the International Atomic Energy Agency (see enclosure).

I should be grateful if you would bring the present letter and its enclosure to the attention of all members of the Security Council.

(Signed) Cornel **Feruta**
Acting Director General

Enclosure

[Original: Arabic, Chinese, English, French, Russian and Spanish]

Verification and monitoring in the Islamic Republic of Iran in light of United Nations Security Council resolution 2231 (2015)*

Report by the Acting Director General

1. This report of the Acting Director General to the Board of Governors and, in parallel, to the United Nations Security Council (Security Council), is on the Islamic Republic of Iran's (Iran's) implementation of its nuclear-related commitments under the Joint Comprehensive Plan of Action (JCPOA) regarding its activities in relation to the Fordow Fuel Enrichment Plant (FFEP). It provides an update on developments since the Acting Director General's previous reports.¹

Activities Related to FFEP

2. In a letter dated 5 November 2019, Iran requested that Agency inspectors be present in FFEP the following day.

3. As previously reported, six cascades of IR-1 centrifuges are installed at FFEP.² On 6 November 2019, the Agency verified the transfer of a cylinder of natural UF₆ from the Fuel Enrichment Plant at Natanz to FFEP.³ On the same date, the Agency also verified that this cylinder had been connected at FFEP in preparation for feeding UF₆ into the two cascades of IR-1 centrifuges, which had remained spinning since 16 January 2016 (Implementation Day),⁴ for passivation. Passivation is a preparatory activity conducted prior to enrichment. On the same date, the Agency also verified that two cascades of IR-1 centrifuges, with all their associated infrastructure,⁵ remained in an idle state and the other two cascades of IR-1 centrifuges, which are to be modified for the production of stable isotopes, remained unchanged.⁶
